ONBOARD

OPTIMISE YOUR NEW JOINER PROCESS

Konsolute

Welcome Onboard!
Revolutionise your organisation's new hire joining experience
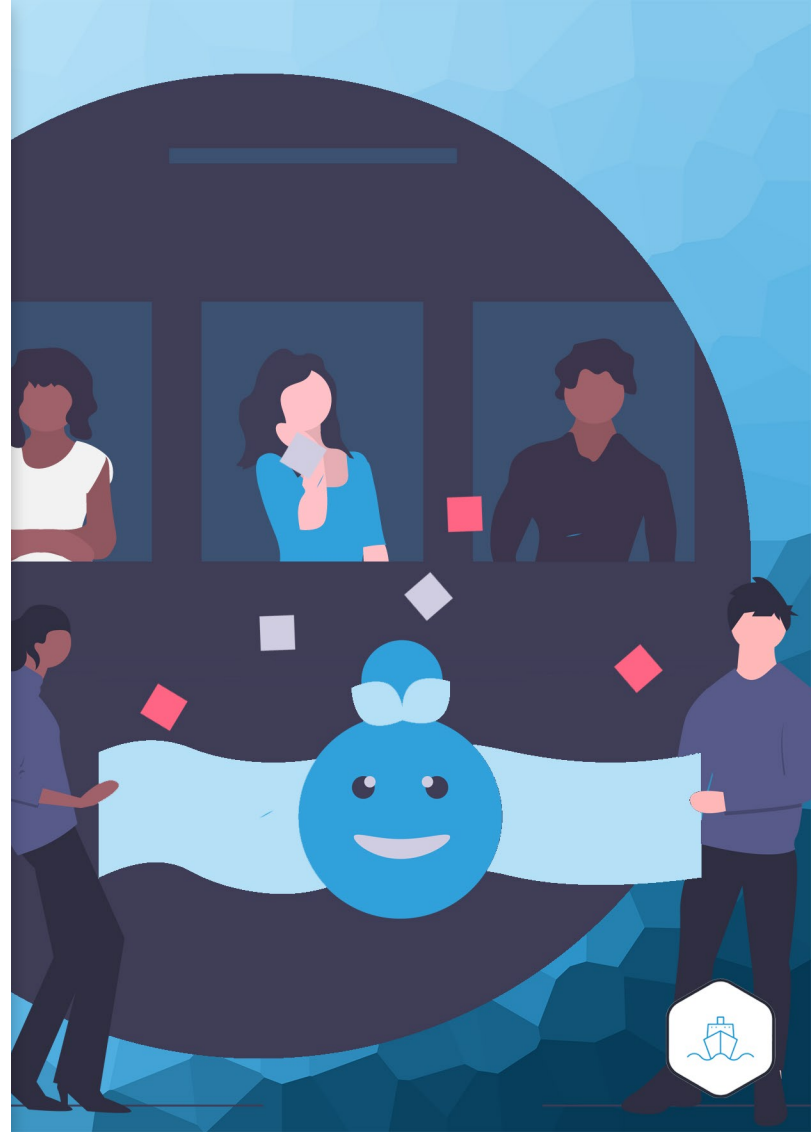

—

The Importance

The importance of onboarding your new hire successfully

Onboard is a revolutionary new hire onboarding platform built for organisations consuming Microsoft 365. Onboard allows you to define your organisation's onboarding experience and further refine this by allowing hiring managers and departments to create specific onboarding experiences. **This achieved through:**

Easy, intuitive and **highly configurable** interface

Customisable approval process

Recommended communities based upon your skills and interests.

Your New Office

Discover your organisation

Joining a new organisation can be daunting. Onboard mitigates these woes by enabling you, as an organisation, to introduce your new hire to the relevant people and communities (Yammer, SharePoint and Microsoft Teams). Hiring departments, can further suggest communities that new hire should join. Hiring managers can refine this by suggesting their own communities.

Intelligently recommends and suggest communities **based your profile information**

Remain compliant by adhering to regulatory requirements through mandatory content

A **seamless Microsoft 365** integrated experience.
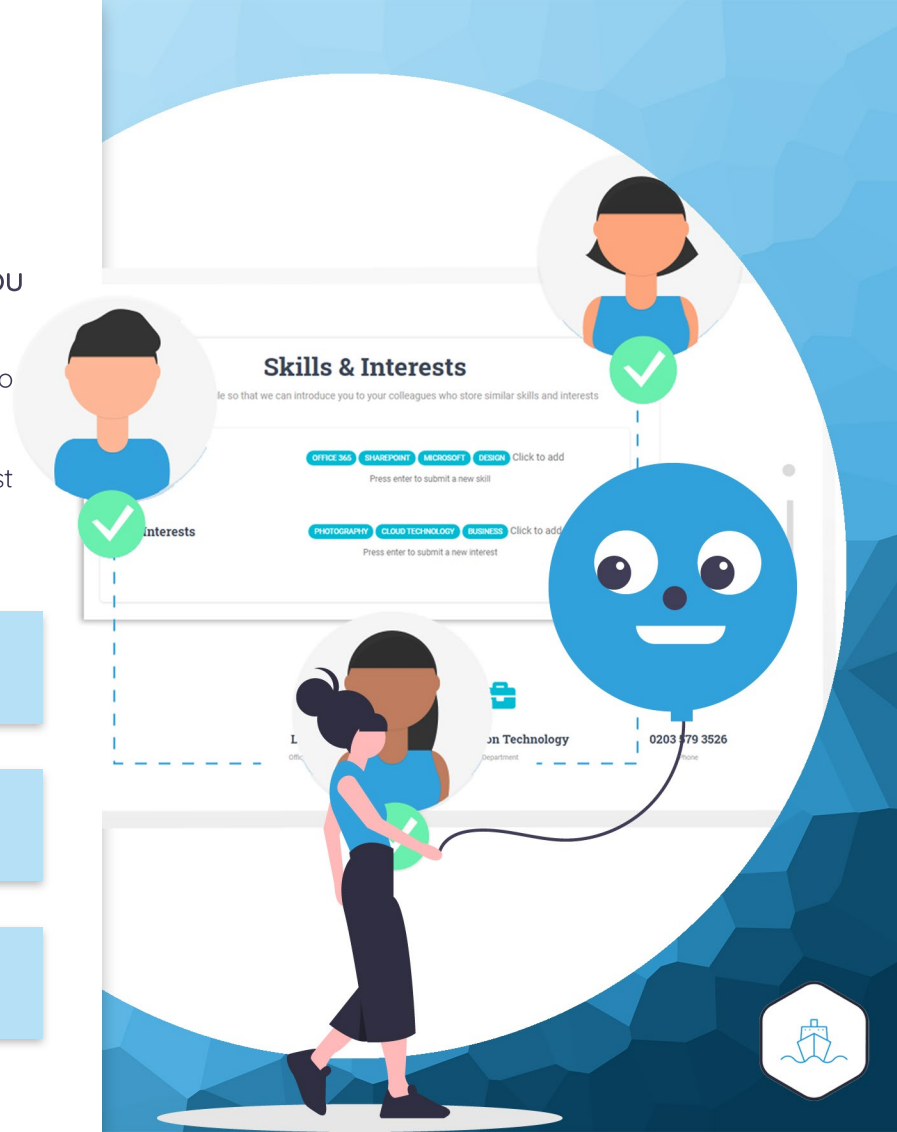

It's All About You

Tailored onboard experience, just for you

With Onboard it's all about your new hire! Onboard allows you to tailor onboarding experience specific to your organisation, business unit or department. The experience can be further enriched by the hiring manager, enabling them to recommend and suggest communities, documents and links.

Utilise your hiring managers knowledge to recommend and introduce your new hire

Remain compliant by adhering to regulatory requirements through mandatory content

Connecting **you** with knowledge, resources and your communities.

Productivity & Integration

Intelligent Recommendation & Suggestion of Communities

An organisation with a thriving community can consist of thousands of communities created within Yammer, SharePoint and Microsoft Teams. Discovering these communities can either be by pot luck or through the knowledge of your colleagues.

Enables your organisation, department and hiring managers to recommend communities

Supports Microsoft Teams, Yammer and SharePoint sites.

Uses your Delve information to further enhance the recommended communities

Productivity & Integration

Your portal

Onboard's portal is crafted and orientated around your new hire. It provides your new hire with a dashboard of activities such as their onboarding experience, recommended communities. Content authors can freely publish information directly to the portal such as news articles, announcements and places to grab some lunch based upon your locality.

Communicate your organisation's **latest information and updates**

Centralised and **easy-to-access**

Discover knowledge, resources and your communities.

Administration & Control

Administrative Interface

Onboard intuitive administrative interface gives you complete control your onboarding experience. Manage your users by defining their access and permissions. Administrators and their delegated users can use the onboard template wizard creation process where you can to define your entire onboarding experience.
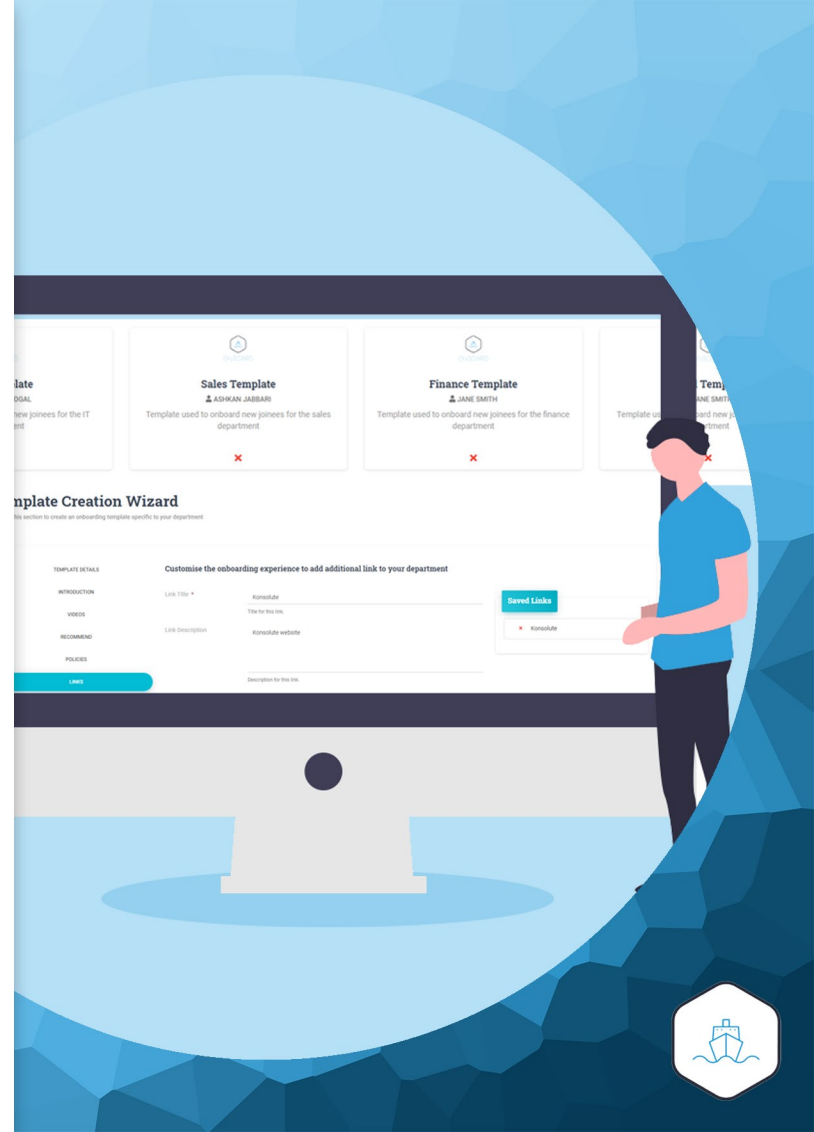

Dashboard

Visualise your statistic for your organisation's onboarding process. See how many new hires have completed their onboarding, measure the level of engaged and interact activity. Run customised reports and make the necessary operational changes.

Did you know that...

88%
New hires think that their employer did a poor job with the onboarding process
